

AI Startup Validation Report

AI tutor for engineering students

Generated 2026-08-21 15:06 UTC

1. Executive Summary

Example structured report.

Market confidence: 80%

Overall risk score: 5/10

2. Market Validation

Market size: Example market estimate — replace with live result

Confidence: 80%

Real competitors

- Example competitor

Verified sources

3. SWOT & Risk Analysis

Strengths	Weaknesses
• Personalized tutoring	• New product
Opportunities	Threats
• College partnerships	• Established platforms

Risk assessment

High risks

Adoption: Students may not switch Mitigation: Pilot with student groups

Medium risks

Low risks

Competitor risk: {}

Market demand prediction: {}

4. MVP / MoSCoW Recommendation

Must Have

Tutor chat: Core value | Effort: medium | Impact: high

Should Have

Could Have

Won't Have

Tech stack: {}

Timeline: {}

Resources: {}

Success metrics: ['Activation']

5. Go-To-Market Strategy

Value Proposition: Fast personalized tutoring

Target Segment: Not provided

Unique Differentiator: Not provided

Positioning Statement: Not provided

Primary channels

Secondary channels

First 100 Customers: Student pilots

First 1000 Customers: Campus partnerships

Customer Acquisition Cost: Not provided

Lifetime Value Estimate: Not provided

Pricing: {}

Launch plan: {}

Growth metrics: {}

Partnerships: []

6. Conversational Advisor

The validation outputs are ingested into the session knowledge base for follow-up questions across SWOT, MVP and GTM.

7. Limitations & Interpretation

Market facts should be checked against the cited live sources. LLM-generated strategy, demand predictions and risk estimates are decision-support outputs, not guarantees.
